CriaAdiciona

```
graph LR; A[AdicionaCasaSemCausarNefasto] --> D[CriaAdiciona]; B[CriaMapaCasas] --> D; C[LerListaFicheiro] --> D;
```

The diagram illustrates a functional dependency where three separate functions or data sources—AdicionaCasaSemCausarNefasto, CriaMapaCasas, and LerListaFicheiro—contribute to the execution of a single function, CriaAdiciona. Each input is represented by a white rectangular box with a black border, while the output is a gray rectangular box with a black border. Three blue arrows originate from the right side of each input box and point directly to the left side of the output box, indicating a directed flow of information or control.
